

What is INSUL-TARP®?

Insul-Tarp® is a patented, revolutionary product like no other on the market today. Its lightweight, Space Age design integrates closed cell foam and an aluminum reflective material with a protective poly coating, all within three, thin layers. The durable poly coating protects the insulation material from potentially damaging surfaces and is impermeable to moisture, helping it to maintain a high R-Value in a minimal amount of space. The superior physical characteristics and overall design of **Insul-Tarp®** make it the ideal product for insulating under concrete slabs in residential, commercial and agricultural radiant heating systems.

Insul-Tarp®'s innovative combination of layers and reflective material enable it to effectively address all three modes of heat transfer: Conduction, Convection and Radiation, improving the performance of the radiant heating system and providing a high slab temperature output.

Insul-Tarp® insulation was designed specifically for under-slab applications. **Insul-Tarp®** provides excellent thermal performance and a vapor barrier, all in one easy to use product. In addition to its thermal and vapor barrier qualities, **Insul-Tarp®** will install in a fraction of the time compared to other products on the market. For example, one 12' x 50' roll of **Insul-Tarp®** will cover approximately 575 square feet. To cover that same area with 4' x 8' sheets of foam board, you would need about 18 pieces. That results in additional time and labor costs. Make the switch today and see the difference!

Insul-Tarp®

- Easy to Install

Lightweight, minimal seaming, rolled into place

- Greater Profits

Competitively priced
Installed in a fraction of the time

- Consistent Performance

Not affected by moisture or humidity
R-Values remain consistent over time

- The Right Choice

Insul-Tarp®'s patented technology leaves all other insulation practices out in the cold. When you install **Insul-Tarp®**, you can rest assured that you are using a quality product for your under-slab insulation needs.

Insul-Tarp® Roll Sizes:

18" x 50', 2' x 50', 3' x 50', 4' x 50'
6' x 25', 6' x 50', 12' x 25', 12' x 50'

Note: 12' rolls consist of (2) 6' rolls seamed together.
Widths on these rolls will vary. On any roll size, always estimate 10% extra to ensure you order enough for proper coverage.

Insul-Tarp® as shown here, has been rolled out and installed with radiant tubing clipped to wire mesh.

Insul-Tarp® Configuration:

- | | |
|------------------------|------------------------|
| 1. Cross-Woven Poly | 4. HD Bubble Layer |
| 2. Reflective Aluminum | 5. Reflective Aluminum |
| 3. HD Closed Cell Foam | 6. Cross Woven Poly |
