## CONTEMPORARY DESIGN

(3-wire installation)

### AQS1 Air Quality Sensor

Senses surrounding pollutants & activates HRV/ERV to high speed if levels exceed normal condition.

- Light changes color to indicate level of pollution in the home
- Pushbutton override switch sets unit to run 1, 2, or 3 hours at high speed
- Three-position switch adjusts sensitivity of control for efficient operation
- Use one per HRV/ERV system.

### MPG 05 Air Flow Gauges

Magnehelic Pressure Gauge for measuring and balancing airflow. (0.50"/2000-OD). Shown here with optional accessories. For complete list of available accessories see Fantech Price List.

(2-wire installation)

### RTS2 Pushbutton Timer

15-minute timer with LED light. Lets you turn unit on high with the push of a button. Includes wall plate.

- Up to four RTS2 timers can be used.
- Install in bathrooms, kitchen, laundry.

### COM/FML Outdoor Hoods/Louvers

White plastic or metal supply or exhaust outdoor hoods. Sizes from 6" to 12". White plastic louvers in 6" or 8" sizes. See Fantech Accessories Book for complete description of models available.

(2-wire installation)

### FD30M Crank Timer

Standard 30 minute mechanical crank timer. Simply turn dial to set desired length of intermittent high speed ventilation.

- Multiple timers can be used.
- Install in bathrooms, kitchen, laundry.

### Supply & Exhaust Grills

White plastic or metal supply or exhaust 4" or 6" sizes. See Fantech Accessories Book for complete description of models available.
